

INTEGRATED PHARMACEUTICAL SOLUTIONS

Holistic service offering. Tailored solution. Expert delivery.

The pharmaceutical manufacturing industry is growing rapidly due to an ever-increasing demand as a result of human longevity coupled with evolving diseases and pandemics. Tsebo Facilities Solutions is here to assist in meeting these rising challenges through our expertise in managing manufacturing and operations.

Our engineering, technical and non-technical business support services are especially solutioned for this complex environment. We provide our clients with reliable business infrastructure and create ideal working environments by maintaining infrastructure through essential support services – all backed by our robust technical architecture and flair for client service.

THE CHALLENGES

- Pharma digitalisation: The need to enhance processes through modern technologies
- The need for specialised COVID-19 cleaning, hygiene and social-distancing solutions
- The need for a highly-skilled operational workforce
- Workforce optimisation
- Increasing requirements to manage energy and utilities efficiently
- Risk management in the drug manufacturing process and quality systems

OUR SOLUTIONS

We provide our clients with reliable business infrastructure and create ideal working environments. We support all non-core business services and operations so that our clients can focus on a customer-centric approach to increase their competitive advantage.

Building and infrastructure maintenance

Technical and engineering solutions

Security systems, technology and guarding

Office and business support

Experienced cleaning, hygiene and COVID-19 solutions

Pest control

Risk management and consulting

Energy management

Professional catering

THE BENEFITS

✓ **Reduced costs**

Our group procurement platform delivers considerable economies of scale. This combined with our industry expertise and best practices, processes and systems enable us to consistently deliver reduced overhead costs.

✓ **Improved efficiency and expertise**

We are experts in technical infrastructure management. Our knowledge in this field is unrivalled and we deliver this accumulated capability to all our clients.

✓ **Convenience**

We assume responsibility for all processes and systems related to infrastructure maintenance, providing a 'one-stop-shop' for our clients.

✓ **Business continuity**

Our extensive Africa footprint and our reliable business architecture allows our clients to focus on growth.

✓ **Health and safety**

- We comply with the Occupational Health and Safety Act, 85 of 1993. Our occupational health and safety policy ensures that our staff and customers always work in environments that are safe.
- To ensure compliance with this legislation, we engage in continual training in accident prevention. We frequently update our GMPs in accordance with the latest practices in this field.
- We audit operational practices on occupational health and safety to drive continuous improvement.

Entrust your non-core business to the **leading facilities solutions provider.**
